

Draw a flowchart and write its pseudocode that adds/multiplies two numbers given by the user.

START PROGRAM: Two numbers

```
DECLARE
    num1, num2, result_add, result_m
PRONT("Enter number1 and number2")
GET num1, num2
result_add = num1 + num2
result_m = num1*num2
PRINT("This is the result: ", result_add)
PRINT("This is the result: ". result_m)
END PROGRAM
```

Pseudocode
