

### Exercise 3

Draw a flowchart and write its pseudocode that divides two numbers given by the user  
(the first number is divided by the second number)

**START PROGRAM:** Two numbers

```
DECLARE
    num1, num2, result_division
PRONT("Enter number1 and number2")
GET num1, num2
    result_division = num1 / num2
    PRINT("This is the result: ", result_division)
END PROGRAM
```

*Pseudocode*
